

For Immediate Release

Cloud-based Project Content and Management Platform, Projecis, Releases New Version with File Preview, File Tracking, Review Workflow and eLearning Capabilities

Projecis offers free trial of its all-in-one platform for secure content management, project productivity, team collaboration, VoIP communication, and Video On-Demand (VOD)

San Diego – October 20, 2011 – Projecis, Inc., a content software and video services company, has announced a significant upgrade to its flagship cloud-based project management platform.

Designed to give users a [knowledge convergence](#) environment for their projects, Projecis enables users to organize content, connect teams, manage tasks and issues, coordinate meetings, and report project status for better project outcomes.

Now, with release 1.5 of Projecis in production, teams can upload files and view file contents for various file formats within the software. Portable Document Format (PDF) files, Microsoft Office documents, images and other formats are supported. Multiple file versions can be uploaded and maintained, and all file versions are monitored to track when and who has accessed any file. A “File Activity” log is now available to team members with proper privileges.

A “Review and Approval Workflow” allows sequential, parallel access to file content. Individual members or groups can review documents or videos in stages, with the ability to put a due date on each stage for accountability. This workflow enables eLearning, since training documents and videos can be uploaded, categorized and set up in review stages for user group training. All reviews are maintained for audit and assessment purposes.

-more-

With customers from the [clinical research](#), [software development](#), and [marketing communications](#) industries, users report that Projecis is robust and provides the functionality required for true content management and team communication that drives increased work productivity.

“With Projecis, our team is more productive and accountable,” says Steve Preiss, VP of clinical and regulatory for EMKinetics. “Projecis gives us greater control over our workflow, and a really convenient way to access important data when we need it quickly. We spend less time searching for data and more time completing mission-critical tasks to meet project deadlines. Our team feels connected and informed on project progress with the platform’s review and approval features. The value and quality added, at a reasonable price, includes many features we use daily for clinical study management such as central document access, training video postings, and more.”

Projecis offers a [free 14-day trial offer](#). Anyone can sign up for the trial and eventually transfer the account to their organization. Projecis subscriptions cost less than 50 cents per day, per seat. For more information: <http://www.projecis.com/Home/Pricing>.

About Projecis

Projecis is a knowledge convergence platform that enables project stakeholders to easily connect teams, organize data, and disseminate information for better business decision-making. Users can access project status, cost measures, files, data, member profiles (including LinkedIn®) – even video news updates – via this secure, web-based platform. Team exchange is enhanced with Communication 2.0 features with options for connecting with members over Skype™, IM/ chat, email, text, landline or mobile phone.
