

For Immediate Release

Projecis Releases New Version of its Cloud-Based Project Content Management Platform with Improved User Interface and Expanded Contact Capabilities

Projecis 2.0 advances project collaboration in the cloud with improved features for files, tasks, issues, discussions, and communication within a managed team environment

San Diego – April 17, 2012 – Projecis, Inc., a content and collaboration software company, has released a major upgrade to its flagship cloud-based project management platform.

Projecis 2.0 includes a re-designed user interface to promote quicker access to content and features, and home page access to Calendar, Recent Activity and To-Do Items for “At-a-Glance” update capability. Combined with [key features](#) such as unlimited storage, file sharing, VoIP meeting center, milestone-task tracking, “work-from-email” ability, document review, and contact management, Projecis allows companies and individuals to track projects and manage information effectively.

[Projecis](#) subscribers will now find an Activity area where project content actions generated by team members can be tracked; from posting files to generating issues to commenting on news, tasks and other items. Details on milestones provide a breakout of assignments required to achieve goals. Subscription members are better coordinated in the Projecis Workspace area, where members are easily assigned to projects with given roles and privileges, or can be deactivated from projects and designated as a “contact.”

File features continue to be a strength of Projecis. Unlimited file storage is provided with any subscription, along with these features:

- File Sharing:
 - o Share files among team members in a secure environment
 - o Generate optional public URL to share files with those outside your team
- File Versioning:
 - o Ensure your team is working on the most current file version
 - o Keep track of file versions and maintain access to earlier versions
- File Activity:
 - o Monitor who reviewed and/or downloaded files and which version
- File Review & Workflow:
 - o Files can be placed in the Projectis review feature for approval or as part of staff training

“Projectis 2.0 raises the bar for project collaboration. It’s more feature-rich than products like Basecamp, much less expensive than Office 365, and has communication features ignored by other systems,” says Paul TanPiengco, head of business development at Projectis.

One Projectis client is the Public Health Alliance for Clinical Trials ([PHACT](#)), a non-profit group focused on testing drugs for delivery to the poorest regions in the world. “The Projectis platform allows our group to collaborate as a team on all our projects, which is especially advantageous since we have team members from around the world, says Ellen Morgan, president of PHACT. “We are able to distribute files more easily and securely, as well as communicate more readily with online chat and group discussions. It’s more than a ‘To Do’ list, since we generate milestones and then associate assigned tasks and issues to each milestone for ease of tracking project goals. Projectis really increases our team effectiveness. We wouldn’t want to work without this tool.”

Projectis is running a [free 10-day trial offer](#). At less than 50 cents per day/per seat, Projectis is one of the most cost-effective products on the market. For more information: <http://www.projectis.com/Home/Pricing>.

About Projecis

Projecis is a knowledge convergence platform that enables project stakeholders to easily connect teams, organize data, and disseminate information for better business decision-making. Users can access project status, cost measures, files, data, member profiles (including LinkedIn®) – even video news updates – via this secure, web-based platform. Team exchange is enhanced with [Communication 2.0 features](#) with options for connecting with members over Skype™, IM/ chat, email, text, landline or mobile phone. www.Projecis.com.
