

Spaulding Clinical Research Selects Projecis Cloud-based Collaboration Platform to Manage Phase I Clinical Trial Projects and Timelines

Tech-focused clinical research organization uses Projecis as hub for meetings, team tasks and Gantt charts

SAN DIEGO and WEST BEND, Wis. – Nov. 6, 2013 – [Spaulding Clinical Research, LLC](#), a clinical research organization focused on driving value for clients through technology and process innovation, recently began using the [Projecis](#) cloud-based [collaboration platform](#) to help manage the execution of their clinical research projects.

The [Spaulding Clinical](#) team is using [Projecis](#) to track tasks required to complete studies quickly and to keep client specifications organized. Features such as the Gantt chart, daily email alerts with to-do items, as well as document review allows them to better manage trials and track results. The meetings feature within Projecis has been integrated into the Spaulding Clinical team's weekly staff meetings. Projecis features such as agenda generation, meeting minutes, and scheduling, are being used to streamline internal meetings and ensure they are objective-driven.

Spaulding Clinical's General Manager and Senior Vice President of Clinical Research Daniel Selness states, "Our focus on industry-leading data quality, delivered on time and budget makes the investment in the Projecis project management platform a valuable addition to our team's solutions. Projecis provides us with an intuitive, cutting-edge project management platform that is cloud-based and uniquely designed to manage complex clinical trials. Using Projecis enables us to create efficiencies while improving the level of service we provide to our pharmaceutical sponsors."

[Projecis Chief Executive Officer Russ Holmes](#) states, "We continue to hear that organizations such as Spaulding Clinical find that Projecis improves their ability to stay focused, rather than spending their time organizing and tracking large amounts of data."

"Spaulding Clinical is a technologically advanced CRO that is growing," states Holmes. "With Projecis, Spaulding has a centralized platform that provides a hub for its expanding staff to either get a quick snapshot of a project's status or quickly access documents and other information associated with a study."

About Projecis

[Projecis](#) (pro-jek-sis) enables project stakeholders to connect teams, organize data, and disseminate information for better business decision-making. Project team members can access files, imported data, milestones, tasks, assignments, issues, and news, which can be professional or webcam video updates. This secure, web-based platform allows for enhanced communications features including VoIP calling, embedded conference center, integration with corporate email and calendar, and private chat with intercom. Team knowledge is maintained with real-time commenting for group discussions, posted content and assignment status updates. Project management tools are also available including Gantt charts, resource views, task percent complete and project health. www.projecis.com. Twitter: [@Projecis](#). Facebook: [Projecis](#).
