

Synergy Research Group Utilizes Projecis Cloud-based Collaboration Platform to Manage Clinical Trials

Moscow-based clinical research organization uses Projecis to increase efficiencies of projects and trials for pharma and biotech companies across the globe

SAN DIEGO – June 10, 2014 – [Projecis](#) announces that **Synergy Research Group**, a leading Russia-based clinical research organization (CRO) providing a full range of CRO services internationally, is using the Projecis cloud-based [collaboration platform](#) to help manage clinical research projects cost-effectively and efficiently.

[Synergy Research Group](#) utilizes [Projecis](#) to track projects and keep client specifications and deadlines organized. Features such as the Gantt chart, daily email alerts with to-do items, and document review allows the busy CRO to better manage trials and track results. Projecis features such as agendas, meeting minutes, and scheduling, create streamlined meetings that continually drive research programs forward.

“Projecis was a natural choice for our company,” said Igor Stefanov, CEO of Synergy Research Group. “The collaboration platform will enhance the Troika Promise of Speed, Cost and Quality that we make to our clients.”

[Paul TanPiengco](#) vice president of marketing and business development at Projecis said, “Global clinical research organizations such as Synergy Research Group find that Projecis improves their ability to efficiently coordinate research programs and communicate with clients on one platform. This saves time and resources for the CRO, and provides timely updates that give sponsors peace of mind that the program is progressing and hitting benchmarks.”

Projecis will be exhibiting at the [DIA 50th Annual Meeting](#) June 15-19 in San Diego, at the San Diego Convention Center, booth #524.

About Projecis

[Projecis](#) (pro-jek-sis) enables project stakeholders to connect teams, organize data, and disseminate information for better business decision-making. Project team members can access files, imported data, milestones, tasks, assignments, issues, and news, which can be professional or webcam video updates. This secure, web-based platform allows for enhanced communications features including VoIP calling, embedded conference center, integration with corporate email and calendar, and private chat with intercom. Team knowledge is maintained with real-time commenting for group discussions, posted content and assignment status updates. Project management tools are also available including Gantt charts, resource views, task percent complete and project health. www.projecis.com. Twitter: [@Projecis](#). Facebook: [Projecis](#).
