## **Projecis Announces Inaugural AIM 1.0 Meeting – Conveniently Scheduled as Outsourcing in Clinical Trials West Coast 2018 Wraps Up**

*Content management software company invites its users and software enthusiasts to explore new platform features and celebrate customer success stories at Hyatt Regency San Francisco Airport on February 22*

**San Diego – December 19, 2017** – [Projecis](#), Inc., a content management and data visualization software company, announces its inaugural Annual Innovation Meeting – Projecis AIM 1.0 – on February 22, at the Hyatt Hotel in Burlingame, California. The meeting is conveniently scheduled during the final hours of the [Outsourcing in Clinical Trials - West Coast 2018](#). AIM 1.0 is free of charge and open to Projecis and other software enthusiasts. Since space is limited, attendees are encouraged to register early. To register: <https://goo.gl/forms/vfiTbeg3WhpVtLWv1>.

Projecis will be presenting “hidden gems” within the Projecis software platform, unique-to-client solutions including clinical applications, customer success stories, its 2018 R&D roadmap, and a Q&A panel discussion.

“We’ve done quite a bit with our flagship platform over the past 18 months, including the addition of dashboards, metrics, reports, custom application capability, and some client branding options. This first annual meeting will explore current Projecis features, and our product roadmap, while celebrating the success of our users,” says Projecis Chief Executive Officer Russ Holmes. “This conference will foster the exchange of ideas, which we hope leads to future development of more user-centric features. Our mission is to work closely with users, and the AIM series supports this objective.”

### About Projecis

[Projecis](#) is a content management and data visualization platform that enables project stakeholders to connect teams, organize data, and disseminate information for better business decision making. Project team members can access documents, dashboards, metrics, milestones, assignments, issues, Gantt charts, resource views and more. Team knowledge is searchable, and maintained in one place with real-time commenting for all posted content. The platform can be extended to add custom applications for more-targeted client needs.
